

# CMPE2000 Lab 1 Checkoffs

Student Name: Kaiden Pitcher-Lumley

**Instructions:** Fill in the sheet below. Put an X under checkoff for the items that are complete as written. Add comments where instructed or required to explain how your solution meets the requirement. The instructor will perform an in-class checkoff once the sheet is complete, and may review your site further (outside of class) to finalize the lab mark.

Requirement	Comments	Checkoff
<b>Which resources did you use for your research? Answer the following questions based on your research.</b> * <a href="https://www.namecheap.com/guru-guides/what-to-put-on-a-personal-website/">https://www.namecheap.com/guru-guides/what-to-put-on-a-personal-website/</a> * <a href="https://www.themuse.com/advice/6-things-you-should-put-on-your-personal-websiteand-6-things-to-aavoid-at-all-costs">https://www.themuse.com/advice/6-things-you-should-put-on-your-personal-websiteand-6-things-to-aavoid-at-all-costs</a> * <a href="https://collegeinfo geek.com/essential-componenets-of-personal-websites/">https://collegeinfo geek.com/essential-componenets-of-personal-websites/</a> * *		
<b>What privacy considerations guide your website?</b> * No Passwords on the site * Only info that is needed * * *		
<b>What items will you be including on your website?</b> * Links to social sites * Images * Work Examples * Useful info (ex. Name) *		
<b>What items will you NOT include on your website?</b> * Blogs because I suck at writing * Clip ART!!! * * *		
<b>**SUBMIT YOUR WEBSITE DESIGN TO THE DROPBOX in addition to this document**</b>		
Indicate how you met the Lab's requirements by filling in the requested information below:		
Uses GitHub Webspace	Yes and it was a pain to figure out	
Use appropriate HTML5 Tags (Header, Section, Aside, Nav, etc)	Pretty sure	
No deprecated tags used anywhere	None used at all	
All pages interlinked	Yes and they have back to previous page links for the non main page	

One or more pages use CSS Grid (specify pages)	Pretty sure all pages use the grid	
Mobile first topology used	yes	
All pages use the same style.css	yes	
Pages have a common theme	Yes maybe a little over board	
If any styling was done outside of one external stylesheet, indicate # of occurrences and explain why:		
Provide a listing of all the HTML tags you used throughout your site	-header, h1, nav, img, a, figure, footer, br, h5, script, article, h2, p, ul, li, H3, section, body	
List the font specification from your site:	<div> Headers - <code>font-family: 'Silkscreen', cursive, monospace;</code>  Other - <code>font-family: 'Chakra Petch', sans-serif, monospace;</code> </div>	
<b>Creative Contributions</b>		
What are some of the creative parts of your site that you'd like me to notice/be aware of?	The images are 98% ones ive taken The placeholder sites in projects use very basic JS	
Are there any websites that influenced you/gave you ideas on how to design your site that you didn't mention in your research?	No	
Any other comments?	No——	

Once sheet is complete, sign up on the whiteboard for instructor checkoff. Mark will not be finalized in class.
